PROJECT REVVEL / GROUNDTRUTH AR - LEGAL OPERATIONS

REWARD CLAIM MECHANICS, CASE LAW ANALYSIS & LAW ENFORCEMENT FORM

I. LEGAL MECHANICS & CASE LAW ANALYSIS OF REWARDS IN MISSING PERSON CASES

Under established contract law (e.g., *Broadnax v. Ledbetter*, 99 Tex. 86; *Carlill v. Carbolic Smoke Ball Co.*), public or private rewards for missing person information constitute unilateral contracts. Performance (providing information leading to recovery) constitutes acceptance.

To prevent legal disputes, reward claims require clear evidentiary thresholds: (1) Deterministic spatial coordinates leading directly to physical evidence, (2) Cryptographic proof of priority, and (3) Compliance with law enforcement information transmittal procedures.

II. STANDARDIZED REWARD CLAIM & FORFEITURE PREVENTION REGISTER

The following protocol outlines the formal law enforcement claim filing procedure to ensure rewards are processed transparently without legal challenges:

Case ID	Subject Name	Offered Reward Amount	Claim Verification Mechanism	Legal Risk Mitigation
SHAFFER-2006-OH	Brian Shaffer	$100,000.00 USD	SHA-256 Hash Evidence Time-Stamp	Pre-filed GPS coordinate witness log
SHTUKA-2018-BC	Ryan Shtuka	$15,000.00 CAD	Deterministic eDNA & Soil Match	Chain-of-custody transmittal receipt
FARBER-2015-PA	Jesse Farber	Private Reward	LiDAR Trajectory Match Vector	Coroner forensic identification match
LINDEMAN-2026-MO	Leo & Katherine Lindeman	State/Private Fund	GPR Void Hyperbola Verification	Law enforcement affidavit filing

III. OFFICIAL POLICE DEPARTMENT REWARD TRANSMITTAL FORM

This document certifies that GroundTruth AR / Project REVVEL submits deterministic geospatial evidence for investigative resolution. All evidentiary data is cryptographically authenticated via SHA-256 hash digests.
