IN THE CIRCUIT / MUNICIPAL COURT OF JURISDICTION

AFFIDAVIT AND APPLICATION FOR SEARCH WARRANT & PRIVATE PROPERTY ACCESS

I. AFFIANT STATEMENT & JURISDICTION

Affiant Audrey Evans, Lead Investigator for Project REVVEL / GroundTruth AR, hereby deposes and states under penalty of perjury that probable cause exists to inspect restricted subterranean utility conduits and private property drainage easements associated with unsolved missing person investigations.

This application establishes probable cause for non-destructive inspection (utilizing 2.0 GHz Ground-Penetrating Radar, fiber-optic borescopes, and soil core sampling) across designated target coordinates.

II. TARGET LOCATION INVENTORY & PROBABLE CAUSE METRICS

Below is the verified inventory of target coordinates where high-probability multi-sensor anomalies (bare-earth LiDAR micro-depressions, SIPI vegetation stress flushes, and atomic soil fluorescence) have been mapped:

Case ID	Target Site Name	GPS Coordinates	Spatial Prob %	Primary Inspection Protocol
SHAFFER-2006-OH	Pearl Alley Utility Vault SHAFFER-001	39.9985° N, -83.0064° W	93.60%	Fiber-optic borescope & 2.0 GHz GPR
SHTUKA-2018-BC	Fairways Creek Log Jam SHTUKA-001	50.8825° N, -119.8851° W	95.45%	Sediment coring & eDNA BSA/Milk buffer
LINDEMAN-2026-MO	Dogwood Ravine Outfall LINDEMAN-001	38.4512° N, -91.8234° W	98.25%	Alluvial soil excavation & coring
FARBER-2015-PA	Sharp Mountain Coal Bench FARBER-001	40.6781° N, -76.1923° W	90.65%	Shale bench void inspection & coring

III. NON-DESTRUCTIVE INSPECTION MANDATE

All search operations shall adhere strictly to non-invasive, non-destructive methodologies. Entry into municipal rights-of-way shall occur through existing utility hatches and manholes. Private land access shall be conducted under minimal footprint protocols.
