THE 600-METER ANOMALY

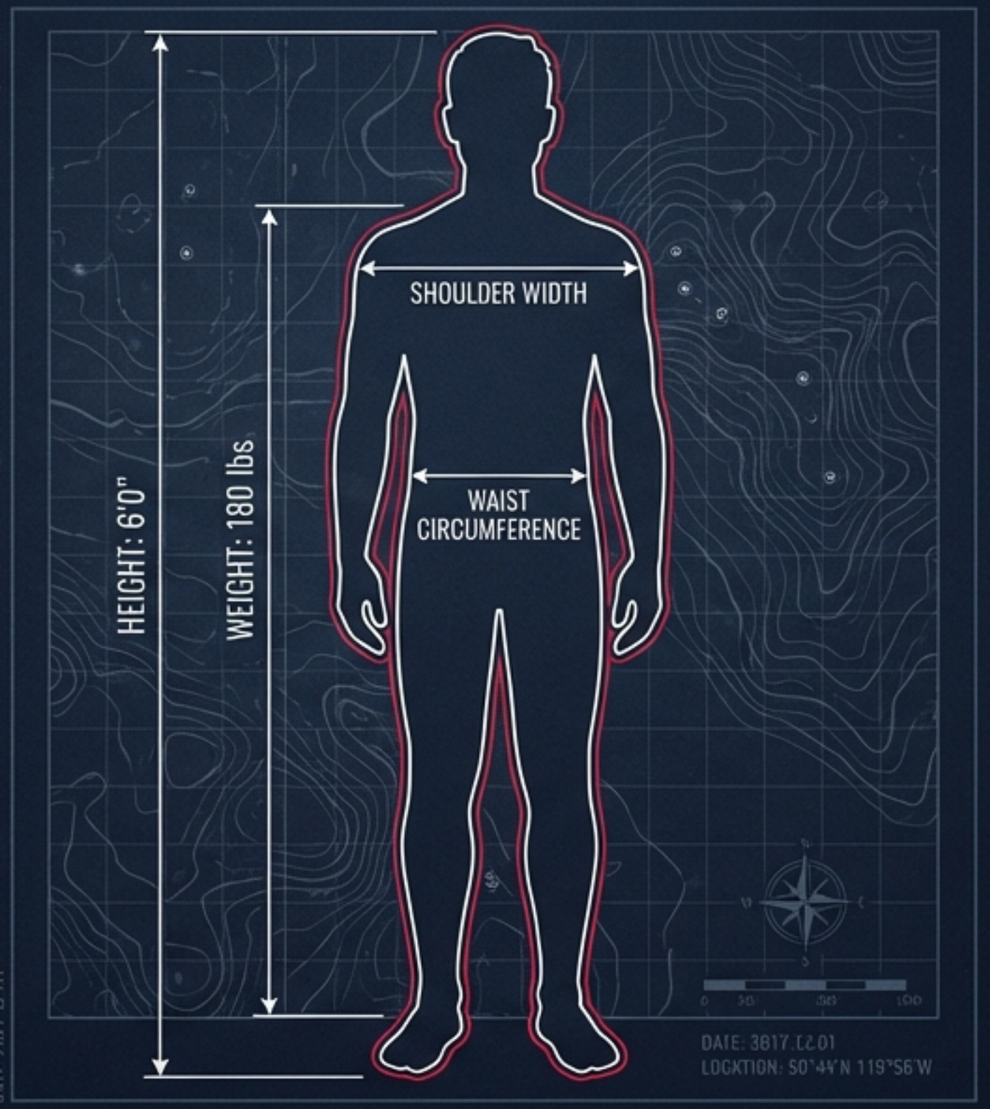

A Spatial Analysis of the Disappearance of Ryan Shtuka.

LOCATION: Sun Peaks, British Columbia
DATE: February 17, 2018
CONDITIONS: -26°C / Heavy Snowfall

How does a man vanish during a 5-minute walk?

NotebookLM

SUBJECT PROFILE

NAME: Ryan Shtuka

AGE: 20

PHYSIQUE: 6'0" / 180 lbs (**Athletic/Snowboarder**)

EXPERIENCE: Arrived Dec 1, 2017. Familiar with area (Lift Operator).

CRITICAL MARKERS (CLOTHING)

1. Burgundy Ball Cap

2. Blue Coat

3. Grey/White Shirt

4. Dark Jeans

"Friends said he was intelligent, loyal, funny, and 'imperfectly perfect.'"

NotebookLM

THE TIMELINE: 19:00 to 02:10

19:00 - DINNER: Ryan and 5 roommates head to Masa's Bar & Grill.

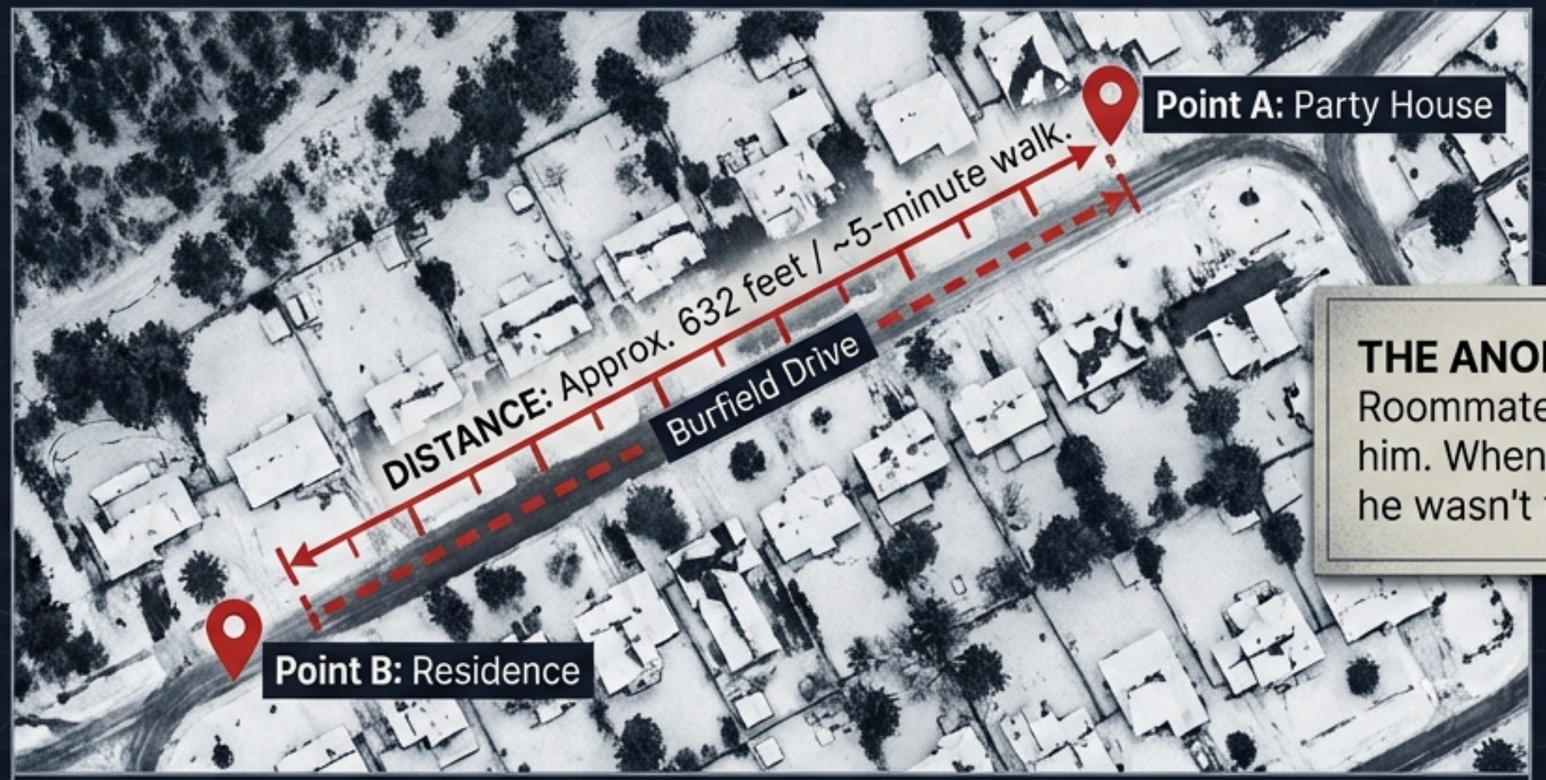

LATE EVENING - SOCIAL: Group moves to "Bottoms Bar & Grill" for a Silent Disco.

POST-BAR - GATHERING: Group moves to a "mellow gathering" at a house on Burfield Drive.

02:10 AM - POINT LAST SEEN (PLS): Ryan stands up, puts on coat and shoes. Believed to be heading home.

Witnesses describe the party as a "controlled environment." Ryan was believed to be heading home.

THE VECTOR

Terrain: Residential street, snow-packed but navigable.

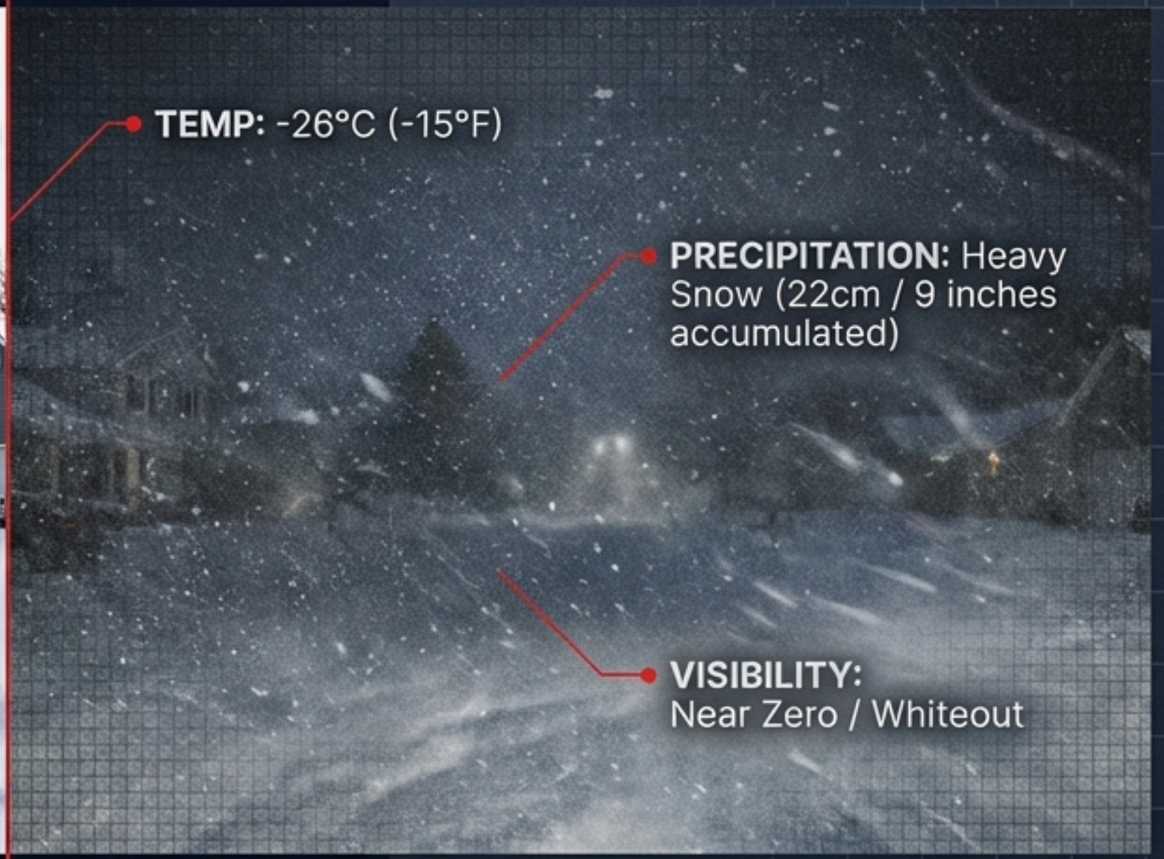

THE ANOMALY:
Roommates left just before him. When they looked back, he wasn't there.

"A route shorter than many disc golf holes."

CASE FILE: R-SHTUKA 2017
DATE: 2017.12.01
LOCATION: 50°44' N 2017
NotebookLM

ATMOSPHERIC RECONSTRUCTION

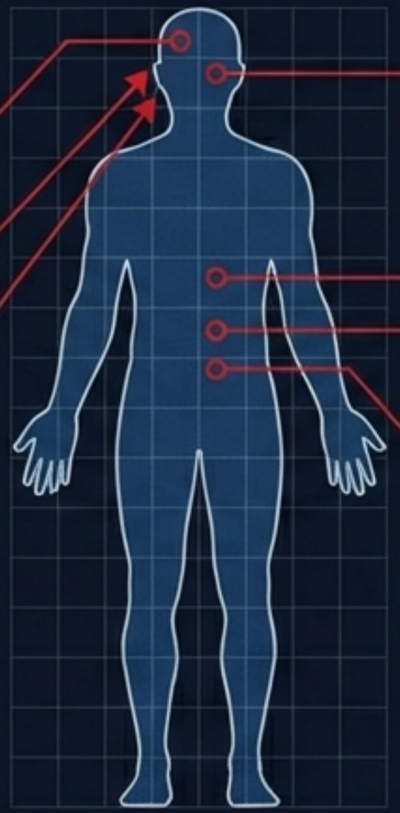

IMPACT: Sensory deprivation. The village lights—usually a "North Star"—become obscured by heavy falling snow.

NotebookLM

THE HUMAN FACTOR: PHYSIOLOGY

INPUTS

- Alcohol Consumption
- MDMA (Reported)
- Extreme Cold (-26°C)

RESULTS

- Disorientation (Impaired Navigation)
- False Warmth (Accelerated Heat Loss)
- Hypothermia Risk

"That which people know when they're sober... isn't always the same as that which they do when drunk."

NotebookLM

SCENARIO A: THE TERRAIN TRAP

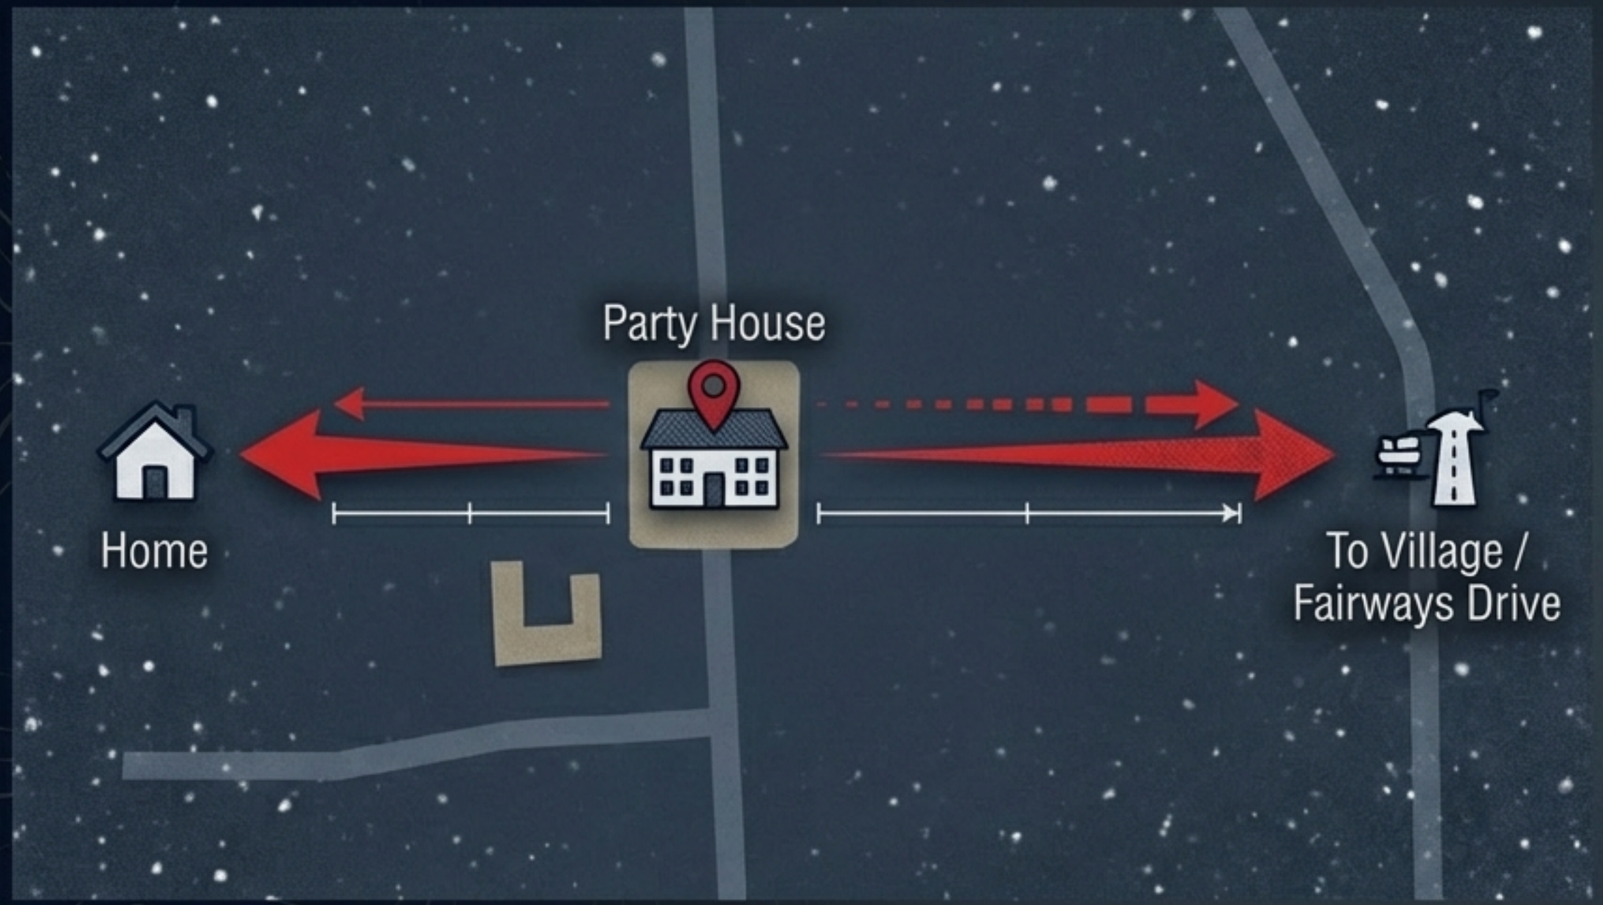

Mechanism: Falling into a tree well creates a suffocation hazard. The body becomes invisible from the surface and shielded from thermal drones by the canopy.

STATUS COUNTER-POINT:
Area grid-searched by experts.
No scent, no tracks.

NotebookLM

SCENARIO B: THE DEVIATION

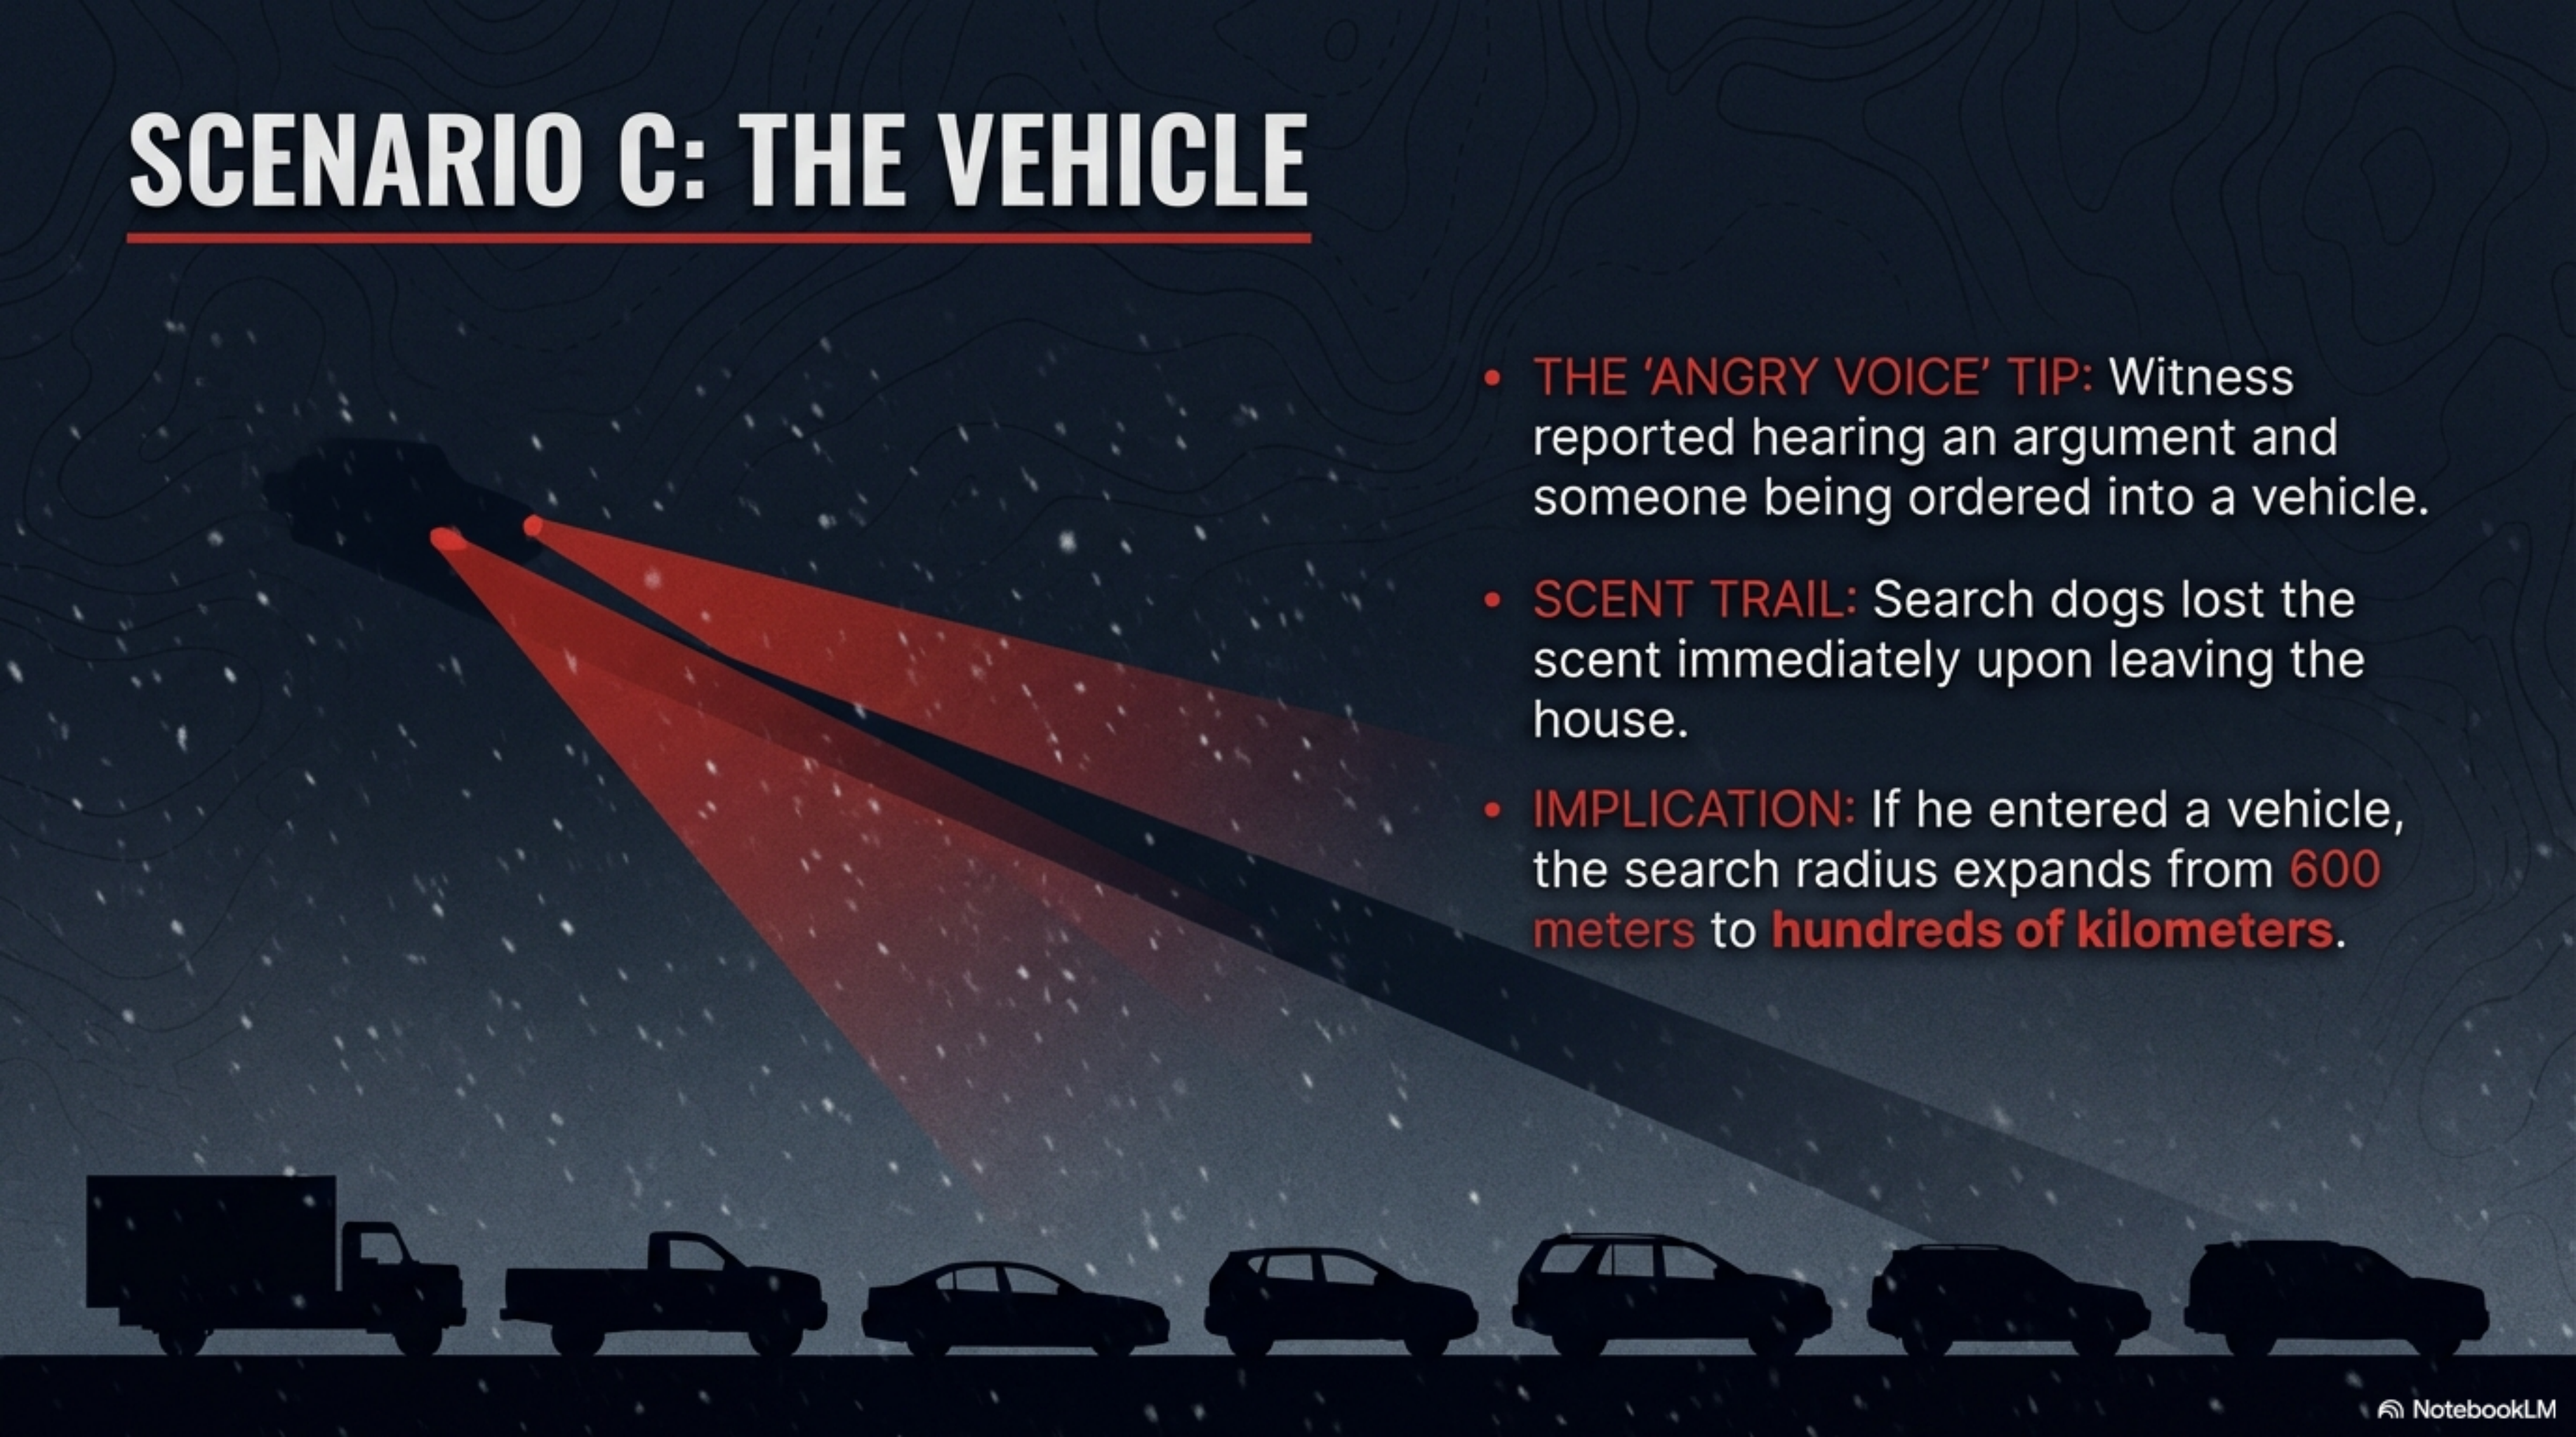

- **THE TIP:** Report suggests Ryan left at 1:30 AM (not 2:10 AM).
- **MOTIVATION:** Walking to village for food before closing.
- **LINE OF SIGHT:** Requires walking on lit roads.
- **DATA CONFLICT:** Village security cameras did not capture him.

"Walked the route he would've taken home. Hard to imagine him walking that far off the beaten track not to be found."

NotebookLM

SCENARIO C: THE VEHICLE

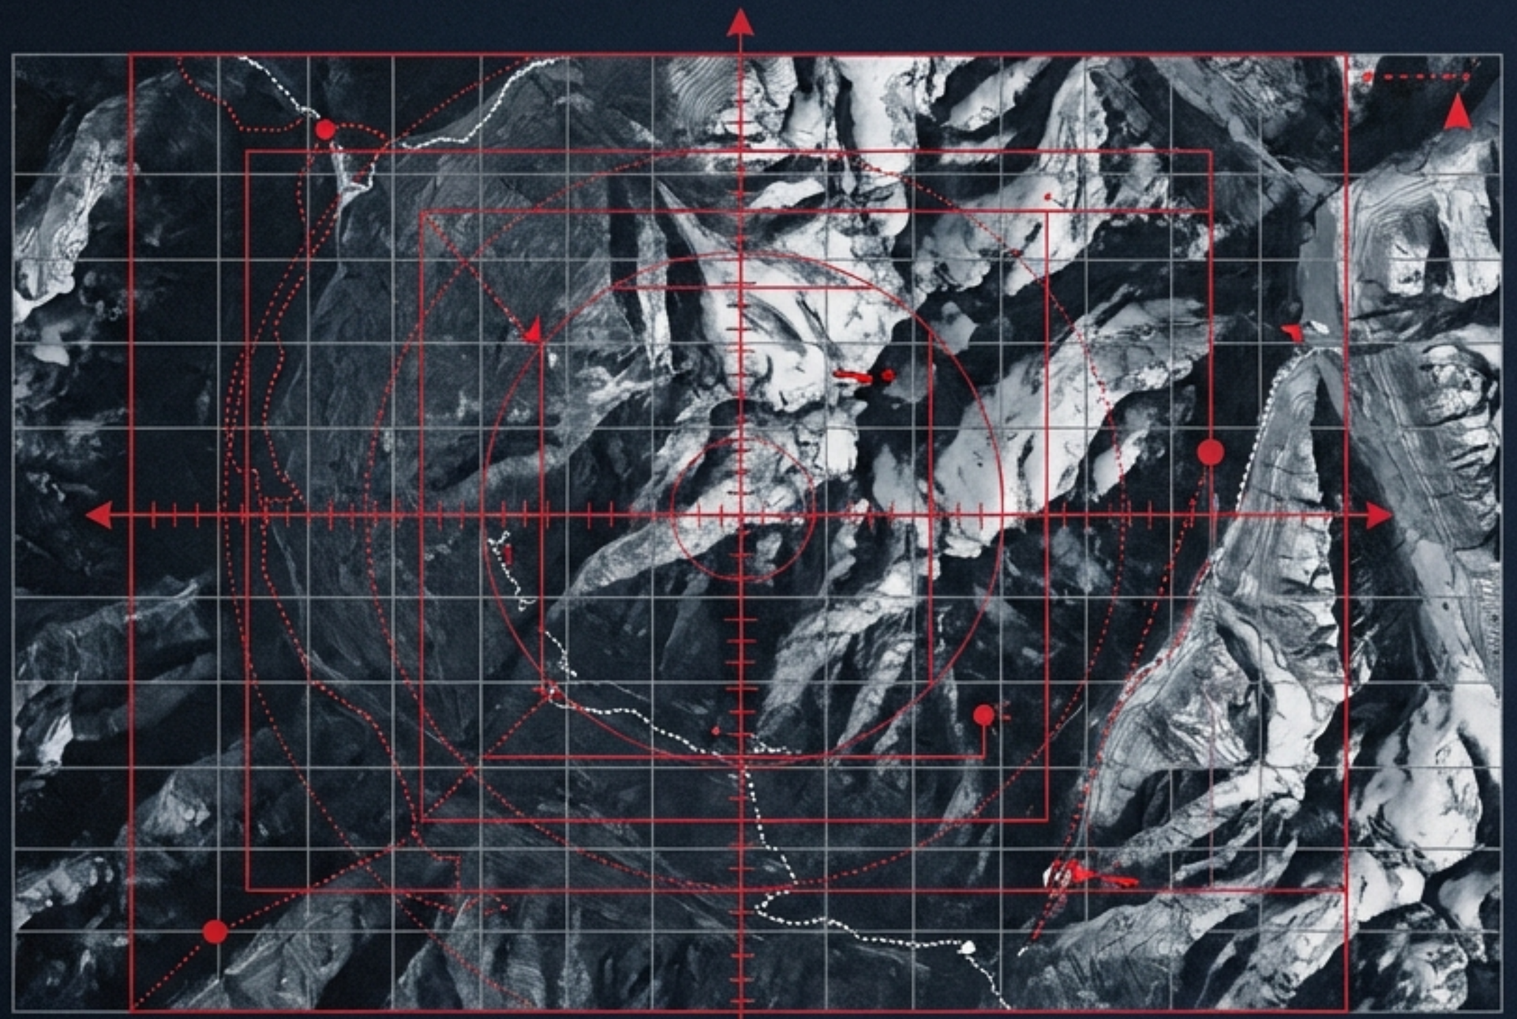

- THE ‘ANGRY VOICE’ TIP: Witness reported hearing an argument and someone being ordered into a vehicle.
- SCENT TRAIL: Search dogs lost the scent immediately upon leaving the house.
- IMPLICATION: If he entered a vehicle, the search radius expands from 600 meters to **hundreds of kilometers**.

NotebookLM

THE GRID SEARCH

JUSTICE INSTITUTE of BRITISH COLUMBIA
Emergency Management Britien

22 SAR MEMBERS

74 VOLUNTEERS

ASSETS: Infrared Drones, Helicopters, Canine Units (Tracking & Cadaver).

DURATION: Months of active searching.

NotebookLM

THE ABSENCE OF ARTIFACTS

- **THE THAW:** Spring melt usually reveals lost items (keys, hats, electronics).
- **FINDINGS:** Zero. No burgundy hat. No blue coat. No phone.
- **STATISTICAL IMPOSSIBILITY:** It defies probability that not a single piece of physical evidence was ever discovered in the search zone.

NotebookLM

SPATIAL ANALYSIS CONCLUSION

JUSTICE INSTITUTE of BRITISH COLUMBIA
Emergency Management Britien

NATURE

High probability of death (-26°C), but low probability of non-discovery due to extensive search.

ACCIDENT

Road accident possible, but no debris or blood found.

FOUL PLAY

Explains the immediate loss of scent and total absence of physical artifacts.

The geography suggests he should have been found. The silence of the mountain suggests he was removed from it.
