TACTICAL FIELD BRIEFING: LINDEMAN SAR OP

McDonald County ICS | Anderson, MO | Operational Period 1

04:15:00Z

Gemini Notebook

DOSSIER

SUBJECT_01: Leo Lindeman

N 34° 03' 45"
W 118° 14' 30"

AGE: 73 yrs
HEIGHT: 5'7"
WEIGHT: 143 lbs

USNG: 18S UJ 324 678

SYS.ID: 4920-LINDEMAN
LAST_LOC: 18SUJ32456789 [48H]
STATUS: MISSING
RISK_LEVEL: HIGH

N 34° 03' 45"
W 118° 14' 30"

SUBJECT_03:
Small white canine
(Breed unconfirmed).

LAST SEEN WITH SUBJECTS_01 & _02
TIME_ELAPSED: 00:48:32
SEARCH_RADIUS: 5KM EXPANDING

DOSSIER

SUBJECT_02: Katherine Lindeman

N 34° 03' 45"
W 118° 14' 30"

AGE: 74 yrs
HEIGHT: 5'2"
WEIGHT: 150 lbs

USNG: 18S UJ 324 678

SYS.ID: 4921-LINDEMAN
LAST_LOC: 18SUJ32456789 [48H]
STATUS: MISSING
RISK_LEVEL: HIGH

N 34° 03' 45"
W 118° 14' 30"

DIAGNOSTIC INSIGHT BOX

VULNERABLE ADULT PROFILE

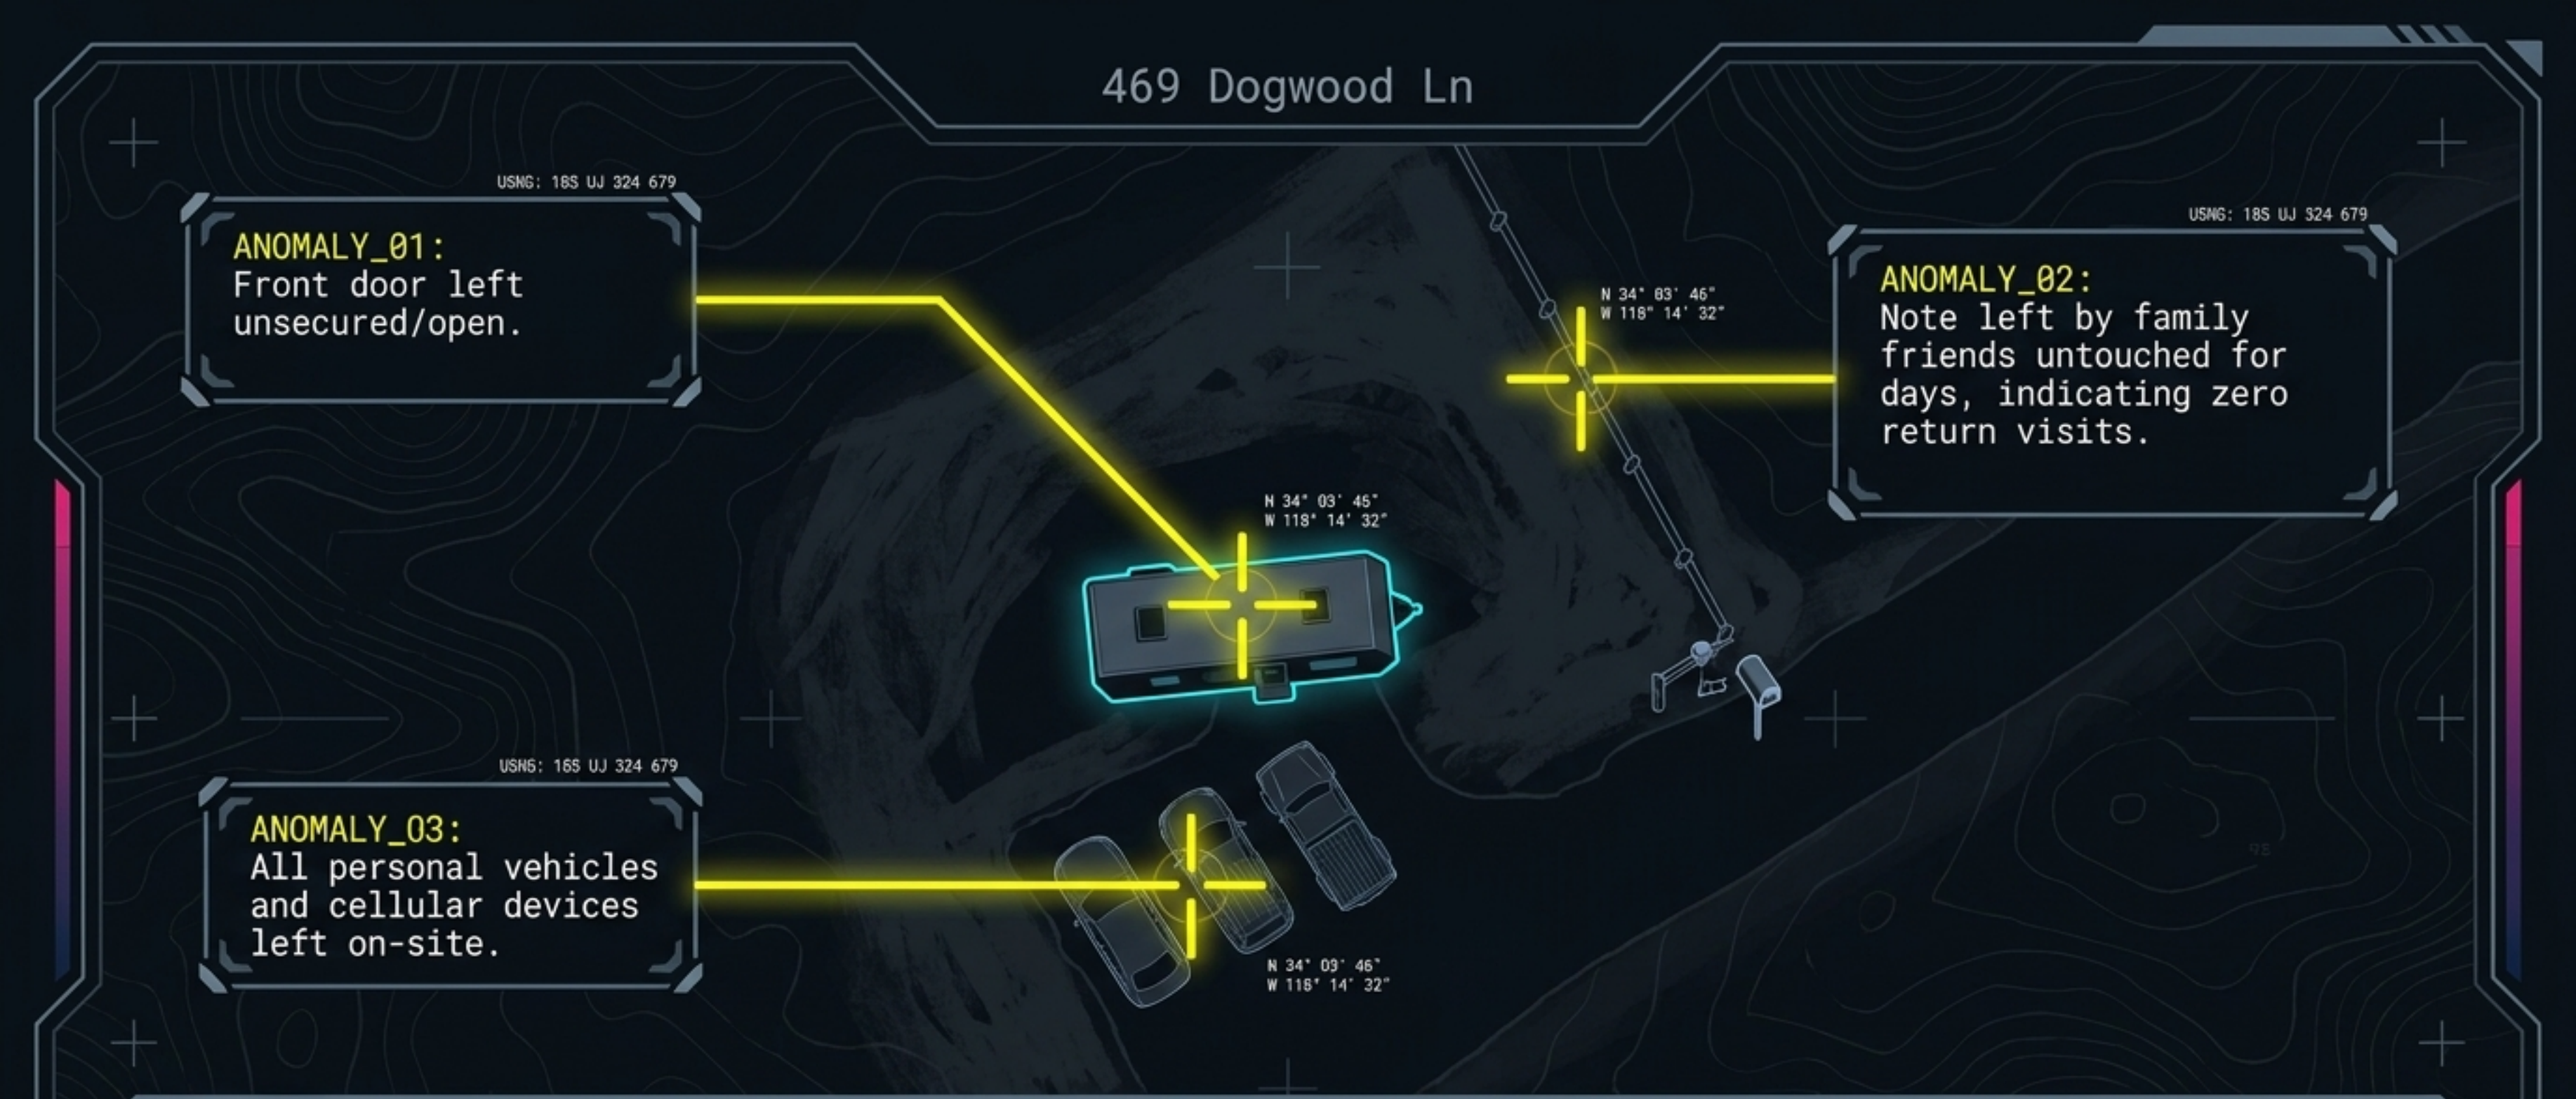

Advanced age combined with potential cognitive decline mandates a maximum-resource deployment protocol, superseding standard delayed-report triage.

PROTOCOL: MAX_DEPLOYMENT PRIORITY: CRITICAL RESOURCE_STATUS: ACTIVE ALERT: IMMEDIATE ACTION REQUIRED

Gemini Notebook

T-MINUS 8 DAYS (SEPT 16):
ESTIMATED DISAPPEARANCE
USNG: 18S UJ 324 678.
LAST KNOWN LOC: 18SUJ32456789
<24 hours: 95% SURVIVABILITY
TACTIC: RAPID RESPONSE
T-ZERO (SEPT 24):
OFFICIALLY REPORTED MISSING
PROTOCOL: INITIATE DEPLOYMENT
ALERT: CRITICAL DELAY
T-PLUS 1 (PRESENT):
OPERATIONAL DEPLOYMENT
STATUS: ACTIVE SEARCH.
TIME_ELAPSED: 00:48:32
100%
8-DAY BLIND PERIOD
SEPT 14
SEPT 16
SEPT 18
SEPT 20
SEPT 22
SEPT 24
SEPT 26
PRESENT
>96 hours: 46% MORTALITY (MINIMUM).
TACTIC: FORENSIC SENSOR ARRAY
STRATEGIC IMPERATIVE: The 8-day Blind Period places this operation significantly beyond the critical 24-48 hour survival window. Tactics must instantly adapt to overlapping biological and forensic sensor deployment.
PROTOCOL: IMMEDIATE ADAPTATION
PRIORITY: CRITICAL

469 Dogwood Ln

SYNTHESIS PANEL

GROUND TRUTH VECTOR: Subjects initiated a localized, on-foot departure with zero preparation for extended travel. The camper is the definitive Hub.

PROTOCOL: MAX_DEPLOYMENT | PRIORITY: CRITICAL | RESOURCE_STATUS: ACTIVE | ALERT: IMMEDIATE ACTION REQUIRED

Gemini Notebook

TERRAIN DIAGNOSTICS BOX

CANOPY: Dense brush, deep woods severely restricting aerial RGB visibility.

TOPOGRAPHY: Karst limestone network (caves, sinkholes, abandoned shafts).

HYDROLOGY: Steep, restrictive drainages.

SYNTHESIS PANEL

TIME: 00:52:00

OPERATIONAL CONSTRAINT: VISIBILITY RESTRICTED. Standard line-of-sight (LOS) sweep widths are mathematically invalid in this sector.

Gemini Notebook

SUBJECT PROFILE ANALYSIS

	NORMAL ELDERLY	DESPONDENT	ADRD (DEMENTIA)
RESPONSIVENESS	HIGH (Verbal/Responsive)	EVASIVE (Avoids contact/Quiet)	UNRESPONSIVE / Will not cry out
CLUE GENERATION	MODERATE (Personal items/Tracks)	LOW (Intentional concealment)	ZERO/MINIMAL physical clues
DESTINATION TARGET	ROADS/TRAILS (Familiar routes)	SCENIC/HIDDEN (Secluded areas)	FORMER RESIDENCE/PATH OF LEAST RESISTANCE

SYNTHESIS INSIGHT

By mapping scene data to the International Search & Rescue Incident Database (ISRID), we must adopt an ADRD operational profile. Subjects will not self-rescue.

Gemini Notebook

USNG: 19TCN 35124 48792

USNG: 19TCN 35124 48792
ELEVATION: 1250 FT

ISRID TELEMETRY DATA

- MEDIAN DISTANCE: 0.5 miles from PLS (50% probability).
- CONTAINMENT RADIUS: 1.0 miles from PLS (89% of ADRD subjects located within this ring).

SPATIAL LOGIC PANEL

The Hub is 469 Dogwood Ln. The Spokes are the paths of least resistance.

The Rim is the 1-mile hard-containment boundary.

Do not allocate resources beyond 1 mile until the inner rings are 100% cleared.

SYNTHESIS PANEL

PROTOCOL: SAR BIKE WHEEL MODEL ADOPTION
PRIORITY: CRITICAL TIME: 01:30:00
RESOURCE_STATUS: ALLOCATION HELD

USNG: 19TCN 35124 48792

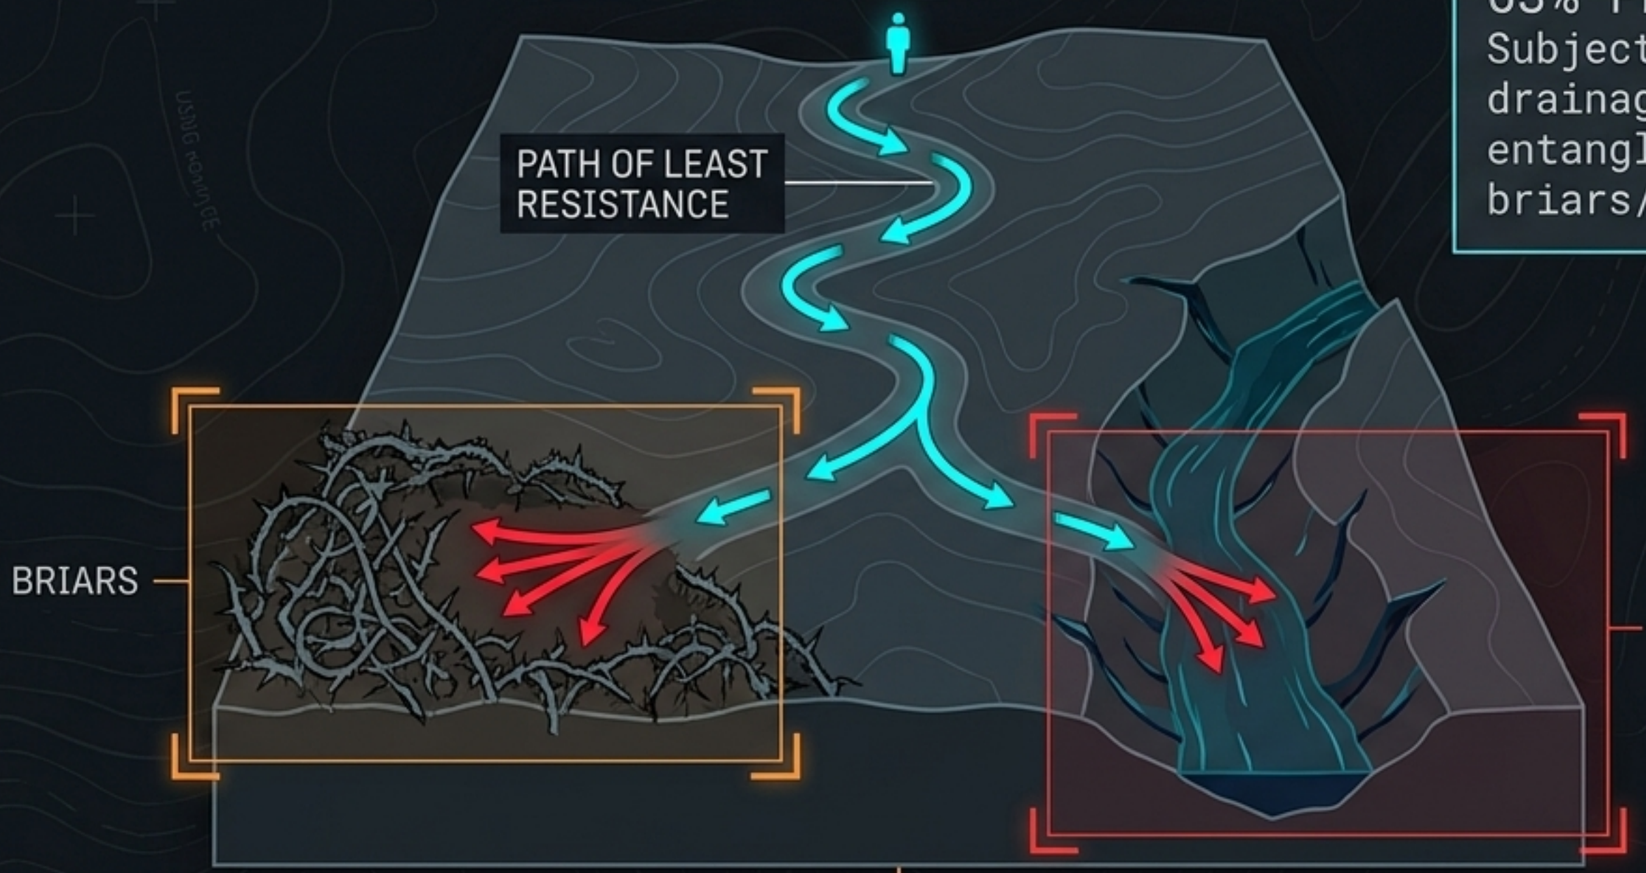

ELEVATION: 1250 FT

Gemini Notebook

MAGNET PRINCIPLE ILLUSTRATION

ISRID TERRAIN AFFINITY

63% PROBABILITY: Subjects located in drainages, creeks, or entangled in heavy briars/bushes.

THE MAGNET PRINCIPLE

ADRD subjects follow gravity and clear paths until physically impeded. They do not backtrack. Searchers must bypass open areas and immediately target catchment features (briars/drainages) where subjects become physically stuck.

TIME: 01:45.00
ELEVATION: 1100 FT

Gemini Notebook

USNG: 19TCN 35124 48792

LAYERED DETECTION STACK

LAYER 1
(Sky/Air)

LAYER 2
(Surface)

LAYER 3
(Sub-surface)

UAV SENSOR:
Thermal/RGB

BIOLOGICAL SENSOR:
Air-Scent K9 tracking the Cone of Scent

CHEMICAL SENSOR:
Lidar void detection & eDNA water catchment sampling

ELEVATION: 1250 FT

STRATEGIC THESIS

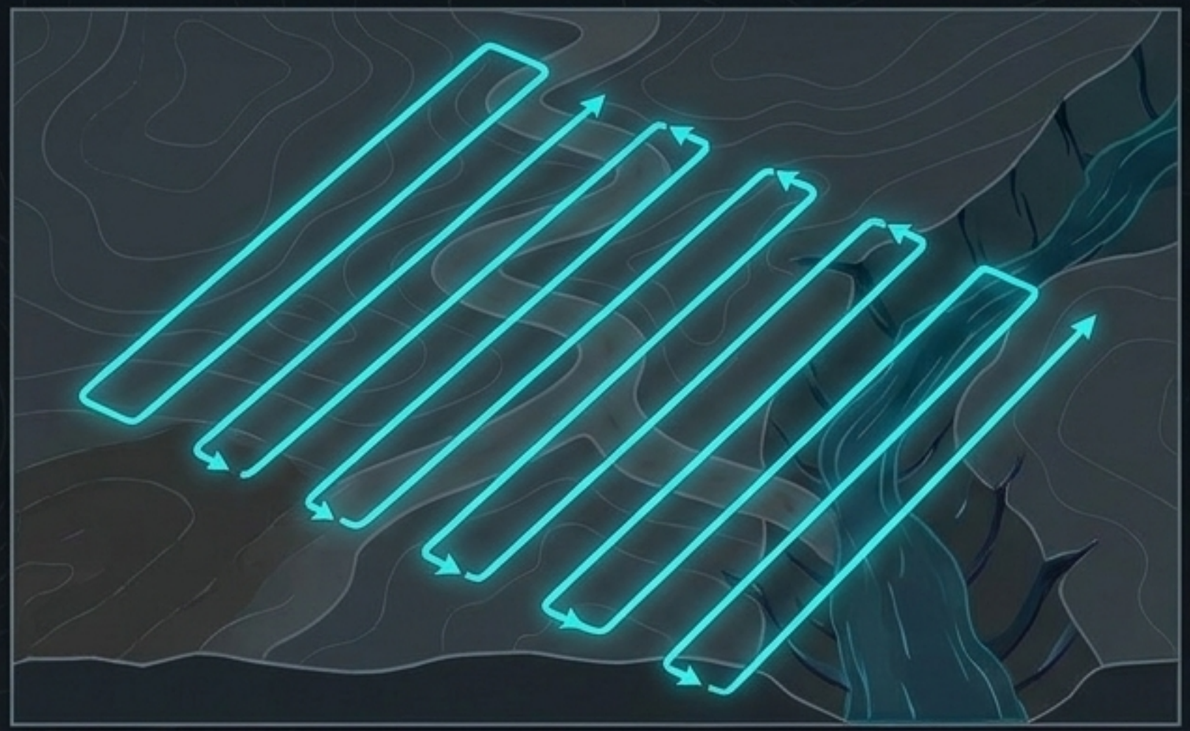

No single asset can penetrate the Ozark canopy. We are deploying an overlapping stack of biological, thermal, and chemical sensors to achieve total environmental saturation.

TIME: 01:45:00

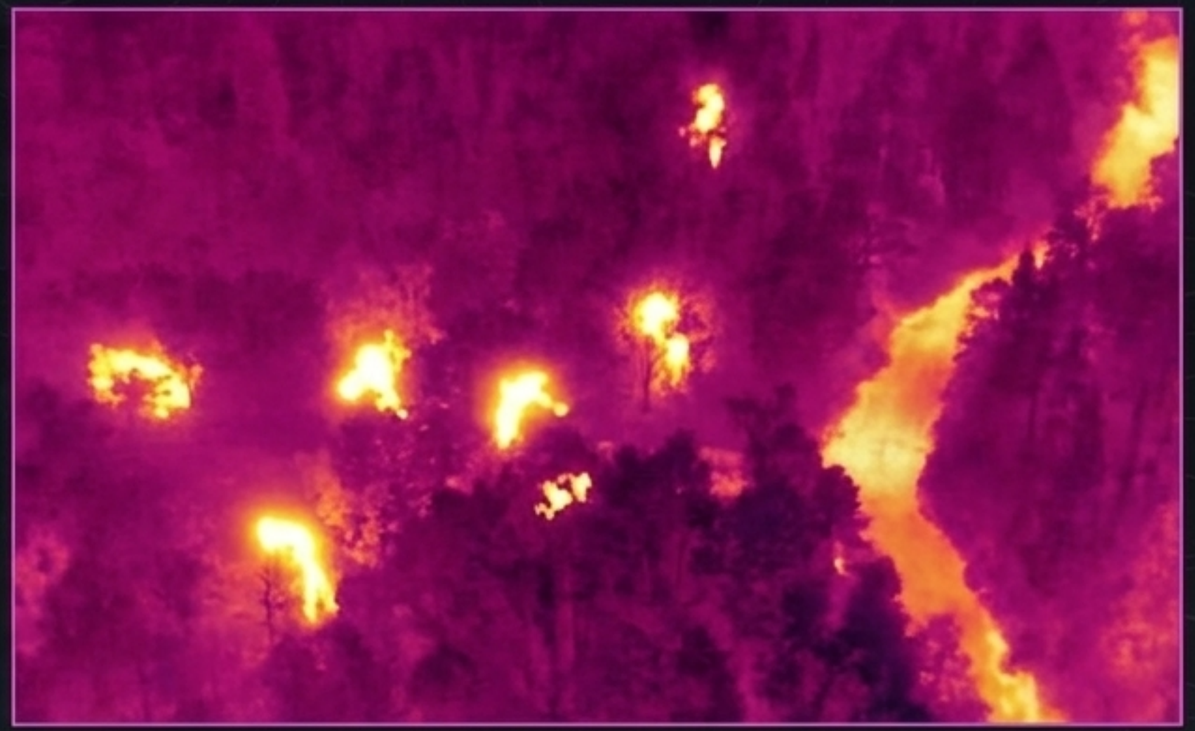

Gemini Notebook

USNG: 19TCN 35124 48792

FLIGHT PATH: DRONE STREAM GRIDS

THERMAL FEED: FOREST CANOPY SIGNATURES

TASKING PROTOCOL	
PATTERN:	Linear feature tracking & intersection anchoring.
TARGET ZONES:	Streams, heavy brush perimeters, and karst openings.

DETECTION CRITERIA

DETECTION: Searching for human/canine thermal anomalies (if alive) or disturbed earth/vegetation variations indicating a localized void or sinkhole.

TIME: 01:45:00

Gemini Notebook

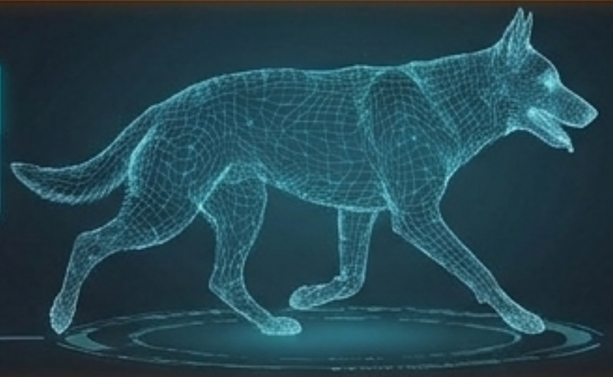

USNG: 19TCN 35124 48792

DIAGNOSTIC TABLE: K9 DEPLOYMENT PARAMETERS

ASSET 1: AIR-SCENT K9s

CAPABILITY

Detects airborne cone of scent specific to living humans.

DEPLOYMENT

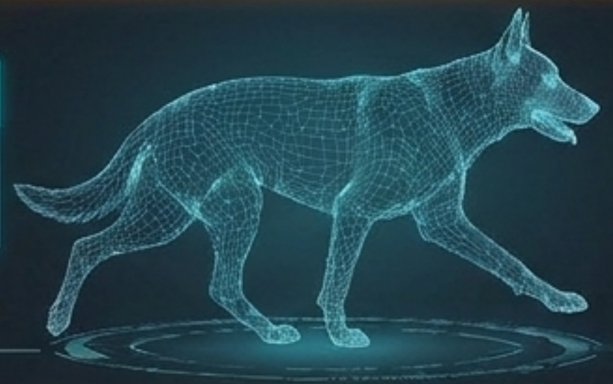

Sweeping sectors 100 yards parallel to roadways and downhill drainages.

TIME: 01:45:00

ASSET 2: HUMAN REMAINS DETECTION (HRD) K9s

CAPABILITY

Detects VOCs (Volatile Organic Compounds) associated with decomposition.

DEPLOYMENT

Targeted insertion into karst sinkholes, deep brush catchments, and dense briar boundaries.

TIME: 01:45:00

TIME: 01:45:00

Gemini Notebook

SARTopo

USNG

USNG

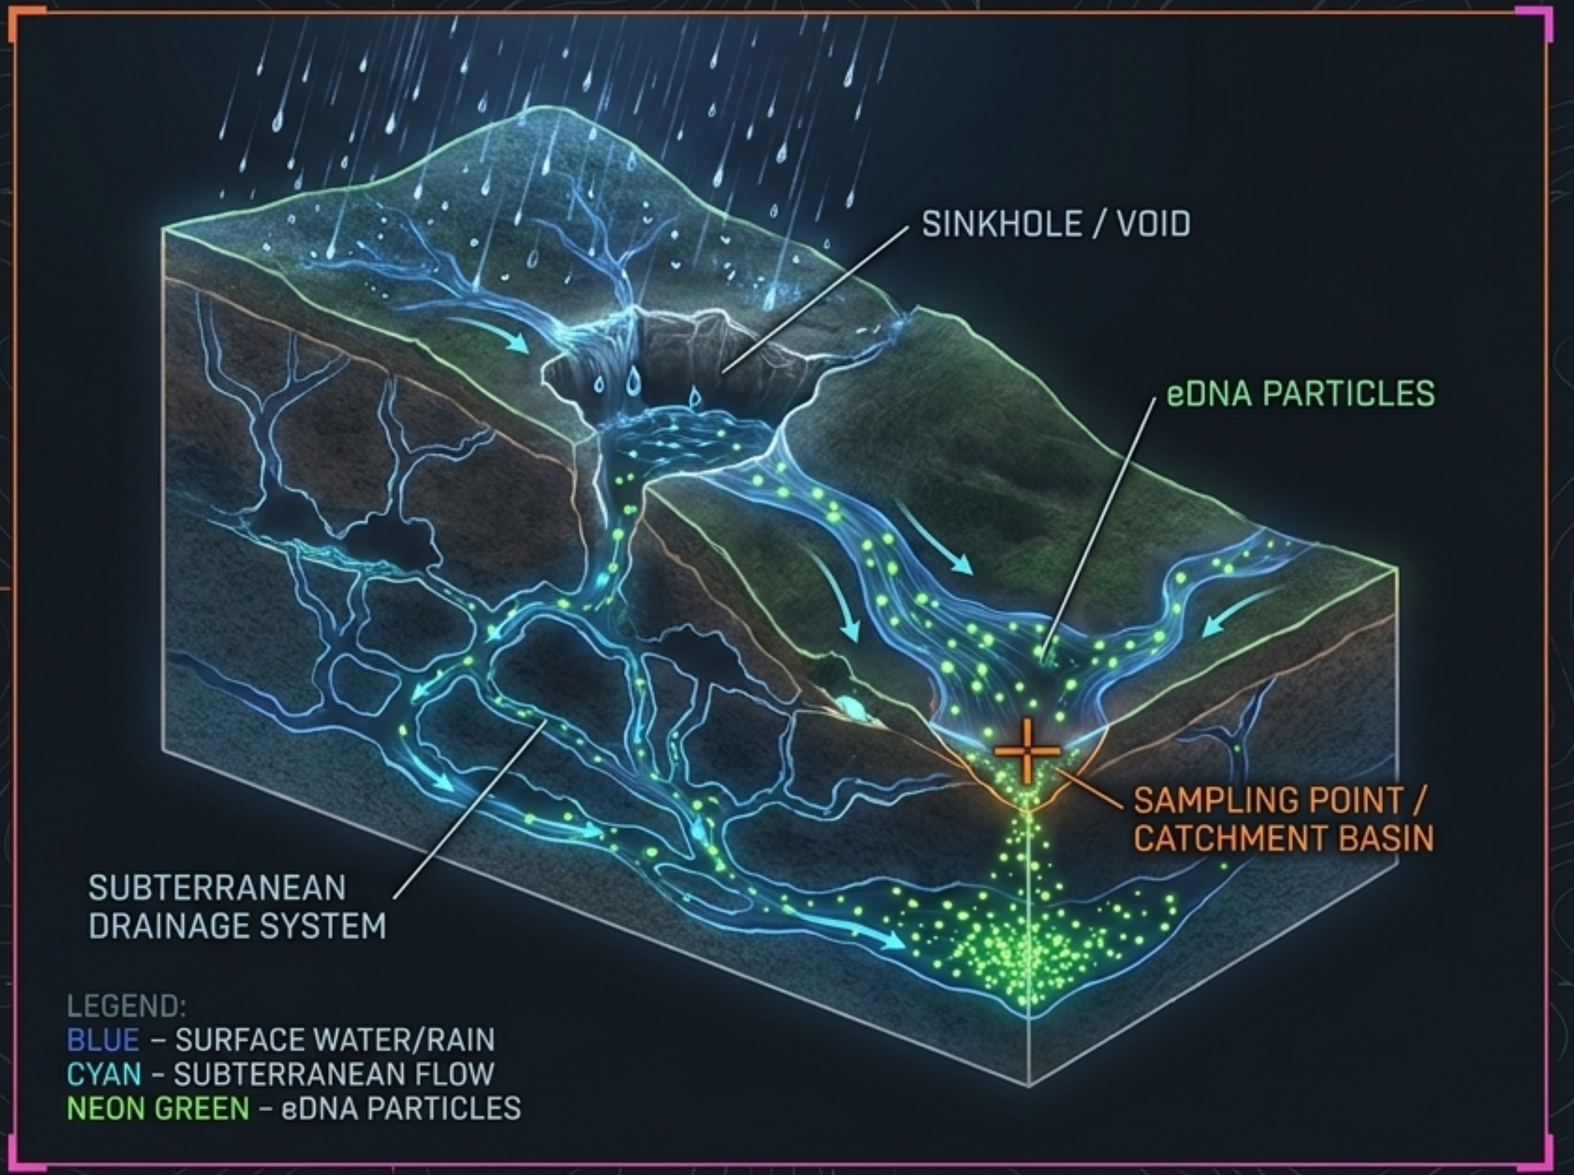

THE FORENSIC GEO-PIPELINE

Due to the 8-day time elapsed, cellular remnants and decomposition fluids migrate via soil and water.

TACTIC: Teams will extract qPCR water samples from downhill catchments.

OBJECTIVE: Detect human/canine DNA to mathematically prove presence within a specific drainage basin, narrowing the search grid.

TIME: 01:45:00
USNG: 19TCN 35124 48792

HIGH-PRIORITY SECTORS (THE SYNTHESIS)

SECTOR A (Hydrological):
The primary drainages and creeks immediately downhill from the camper.

SECTOR B (Biological):
The thickest briar patches and entangled brush along the nearest eastern tree line.

SECTOR C (Geological):
Known karst sinkholes and abandoned shafts within the 0.5-mile median probability ring.

TIME: 01:45:00
USNG: 19TCN 35124 48792

Gemini Notebook

IMMEDIATE REFLEX TASKING

TIME: 01:46:00

TASK 01: Deploy ground trackers to PLS (Camper doorway / property edge) to establish initial vector.

STATUS: PENDING

TASK 02: Launch UAV thermal over **Sectors A & B** to scan for heat signatures.

STATUS: PENDING ASSET: UAV-FLIR

TASK 03: Insert Air-Scent K9s into Sector A drainages.

STATUS: PENDING ASSET: K9 AIR-SCENT

TASK 04: Establish eDNA water sampling stations at the base of the primary creek.

STATUS: PENDING ASSET: FORENSIC TECH

TIME: 01:46:00

EXECUTE SAFELY. TIME IS THE ENEMY. DEPLOY TO SECTORS.
